

Counterfeit Component Policy Statement

PV-Tron Inc recognizes that counterfeiting of components is a serious problem worldwide. We feel it is our duty to ensure that we have stringent policies in place to protect both our valuable reputation and that of our customers.

To continue to provide quality products and prevent the purchase of counterfeit, suspect or unapproved products, we purchase components directly from;

- Manufacturer Direct (OCM)
- Manufacturers Approved Franchise Distributor
- Manufactures Approved Agent / Rep
- OEM / CEM Bonded Inventories

Certain hard-to-find or obsolete products cannot always be obtained from these primary sources. In these instances, PV-Tron will procure from sources that provide the least risk. It may be necessary to source components through brokers or independent distributors, in these cases only Approved vendors will be used. PV-Tron will continue to invest in the latest equipment along with the latest techniques to enable a complete in house screening program for all products acquired from non-traceable sources.

PV-Tron continuously monitors the performance our Approved Vendors utilizing a variety of criteria. As well as running credit checks and utilizing the ERAI screening process on products and suppliers, we also continuously update ourselves on the latest secure trends the market has to offer.
